

Helios

web-based open-audit voting

Ben Adida
Harvard University

Crypto 2008 Rump Session
19 August 2008

How do you run
a verifiable election
in a Facebook world?

Can we expose
more people to the idea of
crypto-verifiable elections?

Some Details

- Python & JavaScript logic & crypto
- Free/Open-Source stack
- Deployed on Google App Engine
- (Soon) Deployable
on Apache/Python/PostgreSQL.
- Easily Customizable
authentication & look-and-feel
